Education

- Walchand Institute of Technology, Solapur.** Jan 2020- July 2024
Bachelor of Technology in Computer Science and Engineering.
- GPA: 9.7
- Walchand College of Arts and Science, Solapur.** Feb 2018- Jan 2020
Higher Secondary Certificate (HSC).
- Percentage: 74

Experience

- Onecorps Digital Limited, UI Developer** July 2025 – Present
- Developed and delivered **8+ full-cycle SaSS, Dashboard and Web Applications** across multiple domains using React.js, Next.js, Figma, and Adobe XD, from initial design to deployment
 - Implemented responsive and accessible UIs using modern CSS frameworks (Tailwind, Material UI, Bootstrap) and React component architecture.
 - Integrated RESTful APIs and third-party services, optimized rendering performance, and maintained clean, reusable code..

Projects

- DevJam Platform - MERN Stack Developer** /DevJam
- Engineered a real-time developer collaboration platform using **MERN Stack**, supporting **100+ concurrent users**.
 - Integrated **WebSocket-based video calls, chat, and notifications**, reducing communication latency by **40%** and improving engagement.
 - Created **15+ reusable React components** with Hooks, Context API, and RESTful API integration, improving code modularity and reducing re-render overhead by **30%**.
- BloodConnect - Emergency Blood Donation Platform | Web Developer** /BloodConnect
- Developed a location-based donor matching system using **React, Node.js, Express, and MongoDB**, implementing **RESTful APIs** to serve users within a **10 km radius**, reducing search time by **50%**.
 - Streamlined the emergency request workflow by optimizing **API calls and state management**, reducing steps from **7 to 4** and increasing completion rate by **40%**.
 - Built a **accessible UI** with **React Hooks**, applying performance optimizations to improve page load time by **30%**.
- MyHealthDiary - Full Stack Developer** /MyHealthDiary
- Architected a health tracking platform enabling users to monitor **daily calorie intake and dietary metrics**, improving tracking efficiency by **45%**.
 - Implemented a responsive React.js frontend integrated with a **Streamlit + Python backend**, processing real-time data for **100+ daily entries**.
 - Integrated **Machine Learning models** for personalized diet recommendations, enhancing prediction accuracy by **30%** and improving user engagement.

Technologies

Languages: JavaScript, HTML5, CSS3

Frontend: React, Next.Js, Tailwind CSS, Chakra UI

Backend / Database: Node.js, Express.js, MongoDB

Tools: Git, Figma, Microsoft Office Suite, Slack, Notion, Jira

Additional Activities And Awards

Competitive Programming(Nov 23): Achieved 11th Worldwide Rank in CodeChef Starters (Div 4)

Hackathon: Achieved Finalist at CoolCode (Hackathon) National Level Event

Typing Speed: Achieved 1st place in a typing competition with a speed of 145 WPM.

Teaching: Taught DSA to so many students. Solved 50+ students Doubts.
