

Srushti Nandgaonkar

Cloud Support Engineer | Network Engineer | Linux System Specialist

nandgaonkarsrushti@gmail.com | +91 74998 86780 | [LinkedIn](#) | [GitHub](#)

Professional Summary

Cloud Support Engineer with **1.5+ years** of experience in enterprise infrastructure operations, cloud support, and Linux administration. Currently supporting McDonald's infrastructure deployment, specializing in **Google Cloud Platform (GCP)** VM provisioning, migration support, and live troubleshooting — with a proven record of SLA adherence and smooth business onboarding.

Education

Walchand Institute of Technology

B.Tech in Computer Science and Engineering, **GPA: 9.3/10**

[Year] – [Year]

Walchand College of Arts and Science

HSC, **Percentage: 62%**

[Year] – [Year]

Work Experience

Capgemini Pvt Ltd, Pune — Senior Analyst

May 2024 – Present

- Support McDonald's enterprise infrastructure operations across new and existing store environments, ensuring reliable technology delivery for business operations.
- Create, provision, and configure **Google Cloud Platform (GCP)** virtual machines to meet business and store operational requirements.
- Lead new store onboarding activities including infrastructure setup, software installation, migration support, and go-live readiness validation.
- Partner directly with customers during deployment and post-go-live support, ensuring smooth transitions and minimal disruption.
- Perform live troubleshooting of Linux systems, network connectivity issues, and infrastructure-related incidents in production environments.
- Diagnose and resolve connectivity issues across edge/store environments by applying core networking concepts.
- Coordinate with internal support teams, vendors, and customer stakeholders to drive timely issue resolution.
- Support migration activities for newly onboarded stores and infrastructure transitions with minimal downtime.
- Perform remote issue diagnosis, incident handling, escalation management, and operational documentation.
- Maintain **SLA compliance** and business continuity during critical production incidents, using **ServiceNow (SNOW)** for Field Service Request (FSR) and Incident creation and tracking.
